"If You Were Here Tonight"

Visit "[If You Were Here Tonight](#)" on [MotoLyrics.com](#)

As the night moves in, love takes on new meaning
If you were here, you would know what I mean to say
Circumstance, leaves me only waiting
For the chance, I only want to love you more
Can't you understand it, girl you know how much I care
It's not the way I planned it.

If you could only know my feelings you would know how
much I do believe.

If you were with now etc...

As the lights go out, I can not pretend - this beds to big
all for me to be
In alone
Can't you understand it
Girl you know how much I care
It's not the way I planned it

If you could only know my feelings you would know how
much I do believe

If you were with me now etc..

Every night alone I just wait here anticipating
For the day I won't feel this way baby please don't keep
me waiting, come to
Me

I wish you were I wish you were my baby (wish you were
with me now)

I wish you were my lady, I wish I was your man, let my
body, let your body
Become one and let me feel your hands.
