When I'm around you, it just feels like home
You kiss away explaining your heart, mind and soul
already know
I'm not in this world, when we make love
I'm lost inside your breathing
You always found me with the way you touch

Our love is, better cause we just keep it simple
Love is, no we're doing that, no we'll never
complicate things
Love is, it's better cause we just keep it simple
Baby, baby

You always tell me, you got a shine
I just exist without you, but with you I truly got a life
So before I kiss you, look into my eyes
And see the way I love you, so deep impossible to
describe

Our love is, better cause we just keep it simple
Love is, no we're doing that, no we'll never
complicate things
Love is, it's better cause we just keep it simple
Yeah, Oooh

Feels good making love, Oh yeah

Our love is, better cause we let it just be simple
Love is, no we're doing that
Love is, it's better if we let it just be simple
We're doing that, no we'll never complicate
things
Complicate things
Better cause we let it just be simple, baby Oh
We're doing that
Complicate things
Better when we just keep it simple
