"Forget About It"

Visit "[Forget About It](#)" on MotoLyrics.com

Stay awake, we've got all we need
Our hearts skipped a beat, tonight
Everytime that we started to
Something's always in our way, for now
Forget about it
Forget about it

It's getting late, I'm far away from home
But I've been misplaced a thousand times before
Kid yourself that it's never you
How many times can coincidence be true?
Forget about it
Forget about it

Waiting for a moment that is quiet
Tryna make out what you say, I'll wait
Hearing things just at the wrong time
Shadows move in doorway line, for now
Forget about it
Forget about it
