Late night falling over the town
As silence fills the air
People hidden back to their homes
To take off the mask that they wear

Six o'clock and I'm already running late
I've got too much on plate
Juggling this so-called life
Leaves me drained each night mmmâ€¦

I just want to find somebody who knows me, yeah
I cannot find someone like that
Before the sun goes down

I finally get to where I need to be
But there's no one here but me now
It seems that there were other plans
These things I don't understand no, no

I just want to find somebody who knows me, yeah
I cannot find someone like that
Before the sun goes down

Will you be there when the sun comes up tomorrow
Will I feel your arms tonight
Can I hear your voice, can I see your smile
Can stay with you a while

Late night falling over the town
As silence fills the air
People hidden back to their homes
To take off the mask that they wear
