Windows down, the night blows in
Tap the beat on the wheel as the tires spin
Until we're there crank the radio
We'll join in with the songs we know

Hey, everything's right
Said everything's right tonight
Hey, everything's right
Said everything's right tonight

Smiles light up as we walk in
Old conversations begin again
Nostalgia's thick as the August air
It takes us back to a time when we didn't care, we
didn't care

Hey, everything's right
Said everything's right tonight
Hey, everything's right
Said everything's right tonight
Ooh, everything's right

Hey, everything's right
Said everything's right tonight
Hey, everything's right
Said everything's right tonight

Hey, everything's right
Said everything's right tonight
Hey, everything's right
Said everything's right tonight
Everything's right
