### "And I Give"

Visit "[And I Give](#)" on [MotoLyrics.com](https://MotoLyrics.com)

It started out two winters past  
Time stood still we were moving too fast  
You ran away April, May and June  
When you came back I was over the moon

I was high, I was high over the moon  
You were there, you were there midnight and noon oh  
Bring it back, bring it back  
We started too soon  
I was high, I was high over the moon oh oh

Then came fall babe and we fell hard  
Bruised our bodies, skinned our knees and our hearts  
Then I got sick yeah but no one could tell  
Now I drink your love drink right from the well

And it's good and its good right from the well  
Wanna taste, wanna touch, wanna see and smell oh  
And it feels like it feels, heals me so well  
Wanna drink, wanna drink right from the well oh oh

Now here I sit in my burning cell  
Summer sun beating hotter than hell  
I need your love like the air I breath  
I need it more than you could ever believe

And you give and you give, give it to me  
And you give and you give all that I need oh  
And I take and I take, blood that you bleed  
And you give and you give, give it to me oh

And you give and you give, give it to me  
And you give and you give all that I need oh  
And I take and I take, blood that you bleed  
And you give and you give, give it to me oh
