[spoken]

And here's the weirdest part about that story,
the guy was so upset that she ripped him off for his
money

she was actually wedged under the front - I told you
about that

- under the front of a firebird and he's trying to get the
ten dollars of rock back out of her hat
while she's wedged under the car.

I think that

- I shit you not she was actually wedged under the front

- I told you about that

- yeah under the front of the firebird

- she was actually wedged under the front

- I told you about that...

[sung]

I fall down

You get up

Not a sound
