I constantly remind myself of who I really am and this  
conscience that I have is not my own I share it with a  
multitude though they may not agree greater things  
exist out there and I know it isn't me

Come on complete me I feel so incomplete 2x  
This world is spinning much too fast, for me to feel at  
ease From this spiritual insanity to this ravaging  
disease When will you stop it or will it just go on and on  
send me a sign to hold onto so I will understand

Come on complete me I feel so incomplete 2x  
spend the night with me please send some hope I got  
none left just this emptiness loss and loneliness can  
you spare some of your freedom can you send some,  
Come on complete me I feel so incomplete
