"A Cycle"

Visit "[A Cycle](#)" on MotoLyrics.com

Baby would you love it if I could recover it
A tired, disfigured, desired, sense of me
Said I know that I don't want a cycle through
In and out of all these holes
Through the cracks of all these walls

So baby would you love it if I could recover it
A tired, disfigured, desired, sense of me
Said I know that I don't want a cycle through
In and out of all these holes
Through the cracks of all these walls
Said I know I don't believe that its all gonna be in line

So baby would you love it if I could be sitting here with
you
And I know all the reasons that I've been believing in
you
Said I know that I don't want a cycle through
In and out of all these holes
Though the cracks of all theses walls

Said I know, I know you would, want to wait, after all
you should
All the time you've believed that its all gonna be in line
So baby would you love it if I could be sitting here with
you
And I know all the reasons I've been believing in you
Said I know that I don't want a cycle through
In and out of all these holes
Though the cracks of all theses walls
And I know I would
Said I know I should
