Your soft cry on my shoulder  
your tears kisses my neck  
and every step threaten the silence

and every step threaten the silence with a knife  
a black ship floats in the morning  
it seems to say "Hello"

the lighthouse paints perfect circles of electricity  
it's an endless dance of golden birds  
this air will fill my heart

the black ship floats in the morning  
and the sea is like a kind lullaby

the lighthouse paints perfect circles of electricity  
it's an endless dance of golden birds  
this air will fill my heart

NA NA NA NA!
