Yeah (Holla!)

Its like the wonder years you blink and i appear  
From a cloud of smoke im like a full court press and  
you choke  
when im near pull up a chair let me explain how i  
maintain the youthful glow. for you that dont know its  
called h2o so stop asking when i walk by how i look so  
young and stay that fly. ITs elementary kick the liquor  
when you turn dirty thirty the rest is a secret so i keep it  
for the worthy some of us need to be doing the bid  
spitting lyrics thats worst than ridlan for kids. They say  
Lyte they aint ready nut and new kid so we kick the  
same stuff as if we were stupid take the same beat and  
loop it 50 times why not that other group did. its idiotic  
average and robotic. i keep it real my mental thick like  
a harley click. i got them singing bob marley hits.( i  
dont want to wait) They dont want to wait in vain but im  
worth all the joy and the pain. come hard when i hit got  
damn you know the name lyte.

Lock this down like its supposed to be the pioneers  
wonder years L Y T E

to her i told yall to listen to her. yeah lyte shes back the  
female g-rap been in the limelight baby girl get your  
mind right

(yeah im a do it like this)

Pass on the insight teach a seed about lyte, and how i  
was the first female to smash the mic. Yeah Nigga, i  
speak the facts of life while a whole lot of others were  
crap on the mic. Still showin mcs what cash look like.  
From the jedda to the porsche to the navi im tight.  
what i got its hot you can have it to praise god work

hard all you have to do i was born to be the lyte to give  
the spark in the dark spread the truth to the youth the  
ghetto joan of ark. ITs sad these kids put you at the  
head of thier thron but all you give them back is raps  
about your bone gettin head in your whip a studio in  
your home. But who cares cuz you dummies all sound  
like clones. Its a mystery to me how you got this far  
cant read cant even count the miles on your car.

Yeah let me take this easy slow it up on them  
I feel the animosity loosen up the grip when i shoot  
from the li i hear it constantly yo lyte kick that same  
shit you did in '86. I cant do that im too evolved too big  
to stay small. In a world full of problems especially the  
us just cant solve them my data too robust they cant  
feel where im headed how all keep the mind, body,  
and the spirit all connected.  
Respected by many and any that want to test bring  
them timbos and leave home that pretty mini dress. Im  
a viking im fighting until the death of me as god blows  
breathe in me i leave the legacy. LYTE AS A ROCK!
