I wanna go higher (x3)

I wanna go higher (higher baby) (x2)

If I ever get down in the dumps  
Short of a dollar nothin change for months  
It seems to rain about every day  
And all the news seeme kinda grey  
Its no illusion call it reality  
So I release more charge from my battery  
We can rise death defy gravity  
Bring about a sense of personality  
So as I walk I look around  
See some go up , some go down  
There goes the mayor his nose is brown  
Guess how he get to wear his crown  
But his hands are shaking the walls are breakin  
And one day they will all fall down  
Sometimes its better that way  
Makin space for a some day

We're on the ground floor got lots to learn  
Slip to the basement and you burn  
First floor and you start to fall  
Out the bed clothes answer the door  
On the second I comprehend  
Positive waves are what I send  
Third floor and you start to flow  
Tell me now where d'ya wanna go

(higher baby)  
I wanna go higher (higher baby)  
Were'd you wanna go?  
I wanna go higher (higher baby)  
I wanna go higher (higher baby)

So tell me baby kinda shakey  
We aint been too friendly lately  
Things sometimes turn out that way  
And that is all that you got to say  
Well thats ok cause time can soothe  
Like a dentist pulls out a tooth  
As each new day will bring a new face

how can I make my rhyme go someplace

First of all she ask for more  
I said sure I dont mind at all  
The waters deep but I'm walking tall  
It dont matter if you're rich or poor  
Aint here to score just raise the floor  
Maximum vibes what I'm aiming for  
I do my war dance back to the wall  
Just returning my native call

And thats the way we're getting by ya  
Always keeping you on the wire  
Takin you higher - call me a liar  
But you won't cause you're feeling inspired  
Work we're going to , jerk you're all thru  
Theres no way you'll stop my breakthru  
Two ways to do it , get in or get out  
Elevate yourself don't hang about  
So wherever lies you'r latitude  
Wherever you are we're gaining altitude  
In all directions starting to climb  
So come on girl - elevate my mind

I wanna go higher (elevate my mind)  
I wanna go higher (higher baby)  
(Let it reach ya) I wanna go higher (higher baby)  
(Elevate my mind) I wanna go higher (higher baby)

I wanna go higher (x3)
