Crash into the room
Scared to turn the lights on
Like a ticking time bomb
She's got a fuse
Living in a rush
That slowly kills the passion
What's a boy to do
I swore I'd never come back
To this place of combat
Timing knows
When you turn the heart strings
Music in the dark sings
Dark things

Do what you want
Do what you want to me
Do what you want
Do what you want to me
Do what you want
Do what you want to me
Do what you want
Do what you want to me

Frozen to the bone
I cannot remember much from that December
Bruised and alone
Pushing through the rough tide
Keep it on the inside
This time

Do what you want
Do what you want to me
Do what you want
Do what you want to me
Do what you want
Do what you want to me
Do what you want
Do what you want to me
You want to me
You want to me
