The world would be a lonely place  
Without the one that puts a smile on your face  
So hold me  
I won

When the days are rough and an hour feels much  
longer

I never doubted you at all  
The stars collide, while you stand by and watch them  
fall? [by and watch them fall]  
So hold me  
And whisper words of love right into my ear

When the days are rough and an hour feels much  
longer  
Yeah when I got you  
Oh to make me feel better  
When the nights are long they

Looking in your eyes  
Hoping they won  
And even if you do  
I  
Hold you through the night  
And you  
But if you need me I

Yeah I got you  
Oh to make me feel stronger  
When the days are rough and an hour feels much  
longer  
Yeah when I got you to make me feel better  
When the nights are long they  
Oh when I got you
