spoken

"Through the absence of presence
And the persistance of time
I share in the lives of the rain..."
Lightening strikes in the heart of the city
It's been a long time since I've been down
There's twenty dollars in my pocket
Waiting for the man to come around
Sure enough I'm feelin' lonely
Cold rain splashes against my face
I'm always thinkin' about tomorrow
And will I still be in the same place
Can you feel the rain?
Walking down the streets at midnight
It's been a long time since I've been down
The cars going by are going my way
Waiting for the rain to come around
Can you feel the rain?
