Build your dream and watch the world tear it down
View it all from outer space
Make it on the moon I'm sure it's safe and
sound

Roll the dice and add the dots, that's your fate
No more bets, it's over
Six sides aren't enough, I'm not into shapes

Try and try I'll get there in the end
Cry and cry I'll get my way again

Count the votes and hope they cast their love your way
Too bad it's not looking good
Make a scene and take the catch of the day
Standing in a crowded room, lost my way
Always someone taller than
Loudest voice rings out, we all share the pain

Try and try I'll get there in the end
Cry and cry I'll get my way again

Cut my sails and sail
Into a headwind
Going gone
Westward backwards
Rock the boat and then
Walk the plank I'll swim
Home

Try and try I'll get there in the end
Cry and cry I'll get my way again
