One I love, two she loves  
Three she's true to me  
All of my friends fell out with me  
Because I kept your company  
But let them say whatever they will  
I love my love with a free good will

One I love, two she loves  
And three she's true to me  
They tell me he's poor, they tell me he's young  
I tell them all to hold their tongue  
If they could part the sand from the sea  
They never could part my love from me

One I love, two she loves  
Three she's true to me  
When I'm awake, I find no rest  
Until his head lies on my breast  
When I'm asleep I'm dreaming of  
My own, my dear, my one true love

One I love, two she loves  
Three she's true to me  
When the fire to ice will run  
And when the tide no longer turns  
And when the rocks melt with the sun  
My love for you will have just begun

One I love, two she loves  
Three she's true to me  
One I love, two she loves  
And three she's true to me
