[1] You've been constructing your lives on the stars  
The stars that gleam above us, idols of mankind  
The stars rule your lives, the stars rule your mind  
Your own lives go down the drain

And I tell you...Stare! The stars fall down

[2] The stars are not gods, the stars are not immortal  
When the stars die, take care you won't fall with them  
Build your own lives, before it's too late  
There could be so much in your lives

And I tell you...Stare! The stars fall down

3.They've been constructing their lives on the stars  
The stars that gleam above us, idols of mankind  
The stars ruled their lives, the stars ruled their mind  
Their own lives went down the drain

I tell you...Stare! The stars fall down
