Searching for a way out
I've come this far on my own
I think I found what I want
But is it what I need
All these questions surrounding
It's killing me

Hold to me love, hold to me love
We can make it out to tell

Please take me away from here
(I've waited so long)
Draw me close to your heart
I can't seem to shake the fear
(My love holds here)
Is it enough to lift me up
Is it enough to lift me

Could I even ask that you'd forgive me
Ask that you'd forgive me
Ask that you'd forgive me
It's killing me

Hold to me love, hold to me love
We can make it out to tell

Hold to me (is it enough to lift me up)
Hold to me (is it enough to lift me up)
Hold to me

Hold to me love, hold to me love
We can make it out to tell

I'm falling in, falling in, falling into open arms
Falling in, falling in, falling into your heart

We can make it out to tell
