Hey, don't you worry
everythings is all right you know
we gonna be just fine
if the rain crashes down over you
I will love you

There is nobody in this world
who could ever take me away from you
I am always by your side
if you need someone to guide you dear
I'd like to try

Don't give up on something you never had before
(never could but we would together)
I promiss you this
you're the one I adore

Here it comes again
filling my soul never want to let go
Here it comes again
be at one with your love
as below so abowe
(here it comes again)

My love is flowing
freer than a waterfall
beyond the edge of time
surender to the emotions
now we can fly, we can fly

And you know there's a reason
that we are, who we are(who we are)
I can not resist you're the one I adore

Here it comes again
filling my soul never want to let go
here it comes again
be at one with your love
as below so abowe
(here it comes again)

Just like it's always gonna be
a place for you and me a ship that we can sail on
Just like if one and one was three
and every thing was free at the end of some rainbow
Just like a needle and a gun a suckle in the sun
or knock upon a hidden door
and it's you I adore

Here it comes again
filling my soul never want to let go
here it comes again
be at one with your love
as below so above
feel it comes again
filling my soul never want to let go
here it comes again
be at one with your love
as below so above
yeah yeahhhh
