Time to face what you are hiding from  
Don't have to do this on your own  
Together we are strong, we don't need anyone  
No matter what they say, the time has come

I'm ready now to start a new beginning  
With all our hopes and all our dreams  
And I know the stars will shine for you and for me  
From the moment you believe

I know they think that I'm no good for you  
But we both know that they're wrong  
Together we can fight, show everyone we're right  
I don't care what they say, our time has come

I'm ready now to start a new beginning  
With all our hopes and all our dreams  
And I know the stars will shine for you and for me  
From the moment you believe

When you believe there's nothing you can't overcome  
When you believe the earth is brighter than the sun  
I believe  
(When you believe there's nothing you can't overcome)  
(I believe)

I'm ready now to start a new beginning  
With all our hopes and all our dreams  
And I, I know the stars will shine for you and for me  
From the moment you believe  
From the moment you believe
