(So you think your dream)
(So you think your dream)
So you think your dream is over

Let nobody bring you down, no, sometimes
You cannot see the horizon
You're on your knees
Don't look back now that you're gone
Got to carry on
Get yourself right back on track
(Get back up)
Let nobody bring you down, no, sometimes
It gets rough and you have had it
You're begging please
Don't look back now that you're gone
I know you are strong
Get yourself right back on track
(Get back up)

So you think your dream is over
Think again
And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again
So you think your dream is over
Think again
And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again

After all is said and done then you're still alive
You are free and you are smiling
You're on your way
Don't let noone get you down when you've had enough
You can turn your life around
(Get back up)

So you think your dream is over
Think again

And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again
So you think your dream is over
Think again
And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again

(Show me the way)
(to get back up)
Stand up tall, head up high
And try again
(Show me)
And try again
(The way)
There's no other way than to try again

So you think your dream is over
Think again
And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again
So you think your dream is over
Think again
And turn your world around
Keep on fighting for this feeling
Hold on and just try again
Try, try again

(So you think your dream)
(So you think your dream)
So you think your dream is over
