

Melodyssey "From The Skies"

Visit "[From The Skies](#)" on MotoLyrics.com

Why don't you think about
Things in another way
Causing complication run the
Disk to break the frame here
They come
We all watch the skies
As the line grows fine the
Nine planets align in time
I know they are all around
And I want you to know

And when they land
Life will change you when
They come around
And when they land
They will do this without making a sound

Why don't you think about
Things in another way
Try to run rings around
The reaper on the day
Here they come, we all watch
The sun but we can't
'Cause we find that it burns
When it shines in our eyes
I know they are all around
And I want you to know

And when they land
I won't be a slave
And when they land
Don't look away
