OPERATE!!!

There right before my eyes
Slowly we unfold
I saw between you
Slowly we unfold now

And in the end you gave me nothing, think about that
I need respect upon the things that you made me do
And in the end you showed me one thing, matter of
fact
I'll never trust another fuck that will make me choose

And you said no
But you wanted me to see
And I know it hurts
You were everything to me

Come - come with me come with me
Pain - give me the pain that I need
Fall - fall with me fall with me
Pain - slowing me down with the feed
