

Connie Smith "Alone With You"

Visit "[Alone With You](#)" on MotoLyrics.com

I'd love to be around you when the lonely night
surround you
How I'd love to be alone with you
What I'd give to have the power to read your mind one
hour
How I'd love to be alone with you
Now just to be with you one night you and me alone
Kiss your lips and hold you tight and have you for my
own
Well this could be a real beginning could be a joy
unending
How I'd love to be alone with you
[harmonica - steel]
I'd love to be around you when the lonely night
surround you
Man I'd love to be alone with you
If I only knew for certain I'd cut out all my flirtin'
How I'd love to be alone with you
Now just to be with you one night you and me alone
Kiss your lips and hold you tight and have you for my
own
Well won't you try be my baby just once and then well
maybe
I could always be alone with you yeah I could always be
alone with you
