You're going away, it's gonna rain today

There's coldness in the wind, the clouds have changed
again

From blue to gray, it's gonna rain today

It won't be long from now with tears my head will bow

You're going away, it's gonna rain today

There's no way for me to stop this storm that's comin'
on

'Cause the rain will pour as soon as you are gone

My dream of happiness will soon be loneliness inside to
stay

It's gonna rain today

There's no way for me to stop this storm that's comin'
on

'Cause the rain will pour as soon as you are gone

My dream of happiness will soon be loneliness inside to
stay

It's gonna rain today
