YOU AND LOVE AND I

(Sanger D. Shafer - Warren Robb)

© '77 Acuff-Rose Music

I wish I could unlock the door that leads to yesterday
Back to when our love was young and we had things
our way
I'll never love that much again if I live a hundred times
Back when there was you and love and I
You and love and I
I could never find another one to take your place
All the love in this old world could never fill the space
I'll spend my forevers dreaming of those tender times
Back when there was you and love and I
You and love and I
Sometimes I still find myself making plans for two
Then I realize how many things I didn't do
There's a million things I'd change if I just had the time
Back when there was you and love and I
You and love and I
I could never find another one to take your place...
I wish I could unlock the door that leads to yesterday
