### "HARDSHIPS"

Visit "[HARDSHIPS](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Many people don't know the hardships of life. I guess i'm just one of them that doesn't care, but every time we're out there we put our lifes on the line.....

verse 1(menace)

so busy in life with these dilemmas

it's so hard so i blow them off, forget about them, y  
cambio el tema

the world is full of danger so to stay alive tienes que  
quitarte esa pena

I don't wish death to anybody cuz there ain't no coming  
back from that

I guess it happens to people who dedicate their lifes  
talking crap

not knowing what will happen to them til they  
dissappear off the map

I just take on my challenges and never look back

wondering out in the streets means you better be  
strapped

or you'll be lying on a coffin forever taking a nap

there's no reason for anyone to be under these  
circumstances

so if you want to, good luck, take your chances

I guess it's just best to have an attitude like, shit,  
conmigo nadie la hace

I smoke mota but i never do the pase

all this shit does is fuck you up and your friends

transporting and selling means a long time in the pen

so many people have gotten locked up and have never  
seen the light again

it's changed the views of many people so they try to  
change with the time that still remains

that's why so many people have backed out of the  
game

trying to stop the hardships, it's hard, but i'ma do the  
same.

chorus(2x)

we just don't know

the hardships of this world

cuidado cabrones, it's hard, it's not like you were told

but anything is possible, and that you better believe

to get rid of the hardships is what we're trying to  
achieve

verse 2(menace)

The world is never gonna change, so many people  
await the day of their death

thugs and gangstas responsible, they see them take  
their last breath

a bloody death caused by people who resolve their  
problems by murderin'

they don't realize that their families are the ones  
they're truly hurtin'

filling them with so much rage that their hearts start  
burnin'

they start cursin'

pero por eso es que debes cuidarte de la gente

no seas pendejo y usa tu la mente

you don't wanna end up like them, who to death they  
have been sentenced

if i could change everything I wouldn't waste no time  
nigga, i'd just change it

but problems and problems is all that i hear

our people should stand up and get rid of the fear

and people like me will make that moment come near

one way is with this rhyme i'm writtin' here

another is if our raza sticks together and sais" this is it"

start bustin on niggas who have been causing this shit

we'll take actions and not tell you to stop cuz we'll just  
be wasting our spit

we'll destroy you, the way you destroyed the others  
and to death you'll be condemed

I don't worry anymore cus I have all of my friends

and to get rid of the hardships, it's hard, but i'ma do  
the same.

chorus(2x)
