"Her Needs"

Visit "[Her Needs](#)" on MotoLyrics.com

She can see you want her
You can feel she knows
Suspicious of her reasons
You wonder where she goes

You can feel the tension
Tighten like a wire
It's nothing you can mention
But still it makes you tired

You won't be used by her today
But you know it's just like every other day
You're fooled again

How long can you be there for her needs

I can hear you wonder
Just what you do it for
But the pressure that you're under
Makes you want her more

You won't be used by her today
But you know it's just like every other day
She plays to win

How long can you be there for her needs
