"If We Stay Here"

Visit "[If We Stay Here](#)" on MotoLyrics.com

We can make our dreams come true
So I will watch you think it through
(You know I'm right)
I heard you crying for the second time tonight
We could build it up our way
We could shape the world our way

If we stay here
We'll die here
We'll never get away
If we stay here
We'll die here
With nothing left to say

If we stay here
We'll die here
We'll never get away
If we stay here
We'll die here
With nothing left to say

We can take this world apart
And make ourselves a brand new start
(You know I'm right)
I saw you smiling for the second time tonight
We can tell the truth one day
But we save the world our way

If we stay here
We'll die here
We'll never get away
If we stay here
We'll die here
With nothing left to say

If we stay here
We'll die here
We'll never get away
If we stay here
We'll die here
With nothing left to say

We can make our dreams come true
So I will watch you think it through
(You know I'm right)
We can take this world apart
And make ourselves a brand new start

We can build it up our way
(I need you there with me, I just can't do this alone)
We can shape the world our way
(Someone to share with me, I just can't be there alone)

If we stay here we die here
If we stay here we die here
With nothing left to say
If we stay here we'll die here
We'll never get away
If we stay here we die here
With nothing left to say
Our way
I just can't do this alone
Our way
I just can't do this alone
Our way
I just can't do this alone
Our way
I just can't do this alone
Our way
I just can't do this alone
