See the light on the horizon  
Colors turning into black  
You can't cry, you can't hide  
You can't dream on

There is no more tomorrow  
Where the elder read the signs  
Out of dark it came without a warning

When the seventh angel cracked the seal  
The human race will die  
It's the prophecy, our destiny  
The fear

From the eternal void  
Out of space and time  
Rising in the darkness  
Rising from the sky  
Thunderball, thunderball, thunderball

Global killers on collision course  
Do we have to pay for sins?  
Feel the storm is coming nearer  
Armageddon!
