"A Place With No Name"

Visit "[A Place With No Name](#)" on MotoLyrics.com

Every morning sun would rise
Every night stars would come
Every second we breathe oxygen
I just wanna tell you there is
A place with no name that's why I need you

I always dream that I could fly up high
But is just an imagination but you know
That I'll be there for you just tell me that you love me
No need to cry I'm always in your heart
Tell me that is no place like no name

You are my world with lots of flower
I just wanna tell you there is
A place with no name that's why I need you...
