There's indication that someone else is standing on the  
ground  
Across the nation there's always people trying to pull  
you down  
Now is the time for us to spend the scene here close  
together  
Deep in the night we're holding on to someone else's  
dream  
Girl can't you see

We need some starlight starlight sun  
There ain't no second chance we got to make it while  
we can  
You need the starlight some starlight sun  
I need you by my side you give me starlight starlight  
tonight yeah

They're out to get you there ain't no .. you're acting like  
a fool  
Love can possess you and make you see that ..  
High in the night this magic's gonna keep us close  
together, yeah  
We'll start to fly cause this is the beginning of your life  
This is the night

Give me some starlight starlight sun  
This is the only chance we've got to make it while we  
can  
You need the starlight starlight sun  
I need you by my side so give me starlight starlight  
tonight  
Light up the world let the love start take charge of this  
masquerade  
Take your delivery and show me that this is your light  
Give me your starlight tonight

There's indication that someone else is standing on the  
ground  
Across the nation there's always people trying to pull  
you down  
Now is the time for us to spend the scene here close  
together

Deep in the night we're holding on to someone else's  
dream  
Girl can't you see

We need some starlight starlight sun  
There ain't no second chance we got to make it while  
we can  
You need some starlight starlight sun  
I need you by my side you give me starlight starlight  
Give me starlight starlight sun  
There ain't no second chance we got to make it while  
we can  
You give me starlight starlight sun  
I need you by my side so give me starlight starlight  
Give me starlight starlight sun  
There ain't no second chance we got to make it while  
we can  
We need the starlight starlight sun  
I need you by my side so give me starlight starlight  
tonight

Gimme gimme that sun (x3)  
Uuuh Yeah  
Gimme gimme that sun  
Uuuh Yeah  
Gimme gimme that sun  
Now is the time for be together  
Gimme gimme that sun  
Starlight Sun  
Gimme gimme that sun, starlight (x2)  
Uuh Babe  
Starlight (x11)
