"About Love"

Visit "[About Love](#)" on MotoLyrics.com

I'm here for you 24/7
And above us is heaven but I'm thinking and sinking

Because I'm here and near
But everything I thought about love
But everything I thought about love
But everything I thought about love was wrong

Do you feel the same for me
Well I'm gonna wait and see
And I believe with relief

Because I'm here and near
But everything I thought about love
But everything I thought about love
But everything I thought about love was wrong

Because everything
Everything
Everything I thought about love
Everything that came from above
Everything I thought was wrong

Because I'm here and near
But everything I thought about love
But everything I thought about love
But everything I thought about love was wrong

Because I'm here and near
But everything I thought about love
But everything I thought about love
But everything I thought about love was wrong
Was wrong
