Must have counted twenty thousand cold county lines
Nothing here will get my weary soul to ignite

Hold me, hold me
Put me back together, baby
Show me that you love me
Feels so good together

Every single fire started with a spark
We could feel it burn when we're dancing in the dark
Take me in your arms before I fall apart
Baby we're a fire that started with a spark
Woah-oh
That started with a spark
Woah-oh

Must've counted twenty thousand cold county lines
... counting miles of pavement that touch the sky?

Hold me, hold me
Angels on the sky..?
Bring me to you, bring us back together

Every single fire started with a spark
We could feel it burn when we're dancing in the dark
Take me in your arms before I fall apart
Baby we're a fire that started with a spark
Woah-oh
That started with a spark
Woah-oh

And my head knows the world turns
But my heart wants to stop
I've been running in circles
Now I know what I want

Every single fire started with a spark
We could feel it burn when we're dancing in the dark
Take me in your arms before I fall apart
Baby we're a fire that started with a spark
Woah-oh

That started with a spark
Woah-oh
