Things work out for the best some people say  
My wanting you has turned to love and just today  
I realized I loved you long ago  
These are some little things I just wanted you to know

I just wanted you to know I love you  
The life don't have the right to let it show  
I should have shown my feelings long ago  
These are some little things I just wanted you to know  
[ steel ]  
The hardest part is knowing you want me too  
Your eyes tell me you understand what I go through  
He's got you but you love me and you'll let it show  
These are some little things I just wanted you to know

And if someday he'll set you free just tell me so  
These are some little things I just wanted you to know
