Oh yes you were my first love I was your first love too
But I never did quite get over you
I almost forgot you almost a time or two
But I never did quite get over you

When I had to leave for a little while you promised
you'd wait
But the days were long and the nights were cold just
plain the rest on fate
When I heard you found a new love I found the new
love too
But I never did quite get over you
[steel]
I hear your new love really loves you mine really loves
me too
But I never did quite get over you
I almost forgot you almost a time or two
But I never did quite get over you
No I never did quite get over you
