You say somehow she don't fit in with your old drinking crowd

Well bartender it's all new to her she's a lady and should be proud.

She loved me so long and asked so little but I always gave her less

Now since she's not with the one she loves she'll love the one she's with.

I remember the nights she cried for me and she had every right

While she stayed at home and waited I was out like she is tonight.

Now, I know how it hurts to be alone and to see her here like this

Now since she's not with the one she loves she'll love the one she's with.

Since she's not with the one she loves she loves the one she's with

I came here to say I love her but I'm too late I guess  
She went as far as she could go without love then turned the list

Since she's not with the one she loves she'll love the one she's with.

--- Instrumental ---

Since she's not with the one she loves she loves the one she's with

I came here to say I love her but I'm too late I guess  
She went as far as she could go without love then turned the list

Since she's not with the one she loves she'll love the one she's with...
