I do my best to shield her from the hurt I'm finding now  
And I try hard not to give him reason to die  
We'd play our part so well we still have the love in trust  
Oh, what are we gonna do about us?

Us, two people that were meant for each other  
Us, a happiness we found  
Us, the reason for the chance we are taking  
Oh, what are we gonna do about us?

I tell her I miss her when I'm away from home  
And he thinks I get lonely when he leaves me alone  
The moments we steal soon won't be enough  
Oh, what are we gonna do about us?

Us, two people that were meant for each other  
Us, a happiness we found  
Us, the reason for the chance we are taking  
Oh, what are we gonna do about us?...
