(You see I did what I thought that I needed to do)

I got you started.
But now, but now I need you to stop.
Because I, I don't see you.
'N I start you up a lot.

You see I did what I thought what I needed to do
You see I did what I thought what I needed to do
I did what I thought what I needed to do
I did what I thought what I needed to do

I, I don't like the things.
When, When they stay the same.

You, you guy, You've got a girl.
Who likes it to change.

You see you got a girl (badado)
You see you got a girl who likes it to change

You see I did what I thought that I needed to do
I did what I thought what I needed to do
I did what I thought what I needed to do
I did what I thought what I needed... (x2 couplet)

I did what I thought what I needed to do
