Oh baby I'm honest with you
Just let me level me
I say we've been this way since the day we met the
devil
What we do and don't we
Know how to do and won't be... we don't know how to
rebel
What it was we were wearing, the noise that you've
been hearing
Our common... you would never know a lot of people
carrying.
Let's face it you're afraid of, to find out what we're
made of
In the process... there is nothing here we're failing.

... just my suggestion, you don't know...
And even if you knew it, you might not know who threw
it

That might be worth some thinking, or that might be my
impression.
So let's not mention you, you paid attention to
goodnight...
... from nothing on you...

... I bounce so strong, it won't be wrong
And it will never be asserted.
Stick together, that's the plan,
Stick to that the best we can,
Nothing left to say thank you!
... I bounce so strong, it won't be wrong
And it will never be asserted.
Stick together, that's the plan,
Stick to that the best we can,
Nothing left to say thank you!
