Make a wish, ya, make a wish,

Lady, I'm certain that I dreamed you, over nights  
suspenses

Leaving me defenseless on this late night  
Lost in my emotion, searching for devotion  
Someone I could love without loud  
And love em is the empty space of my heart  
I could live with no doubt  
I feel invincible when we create this all, baby

I'm just a shooting star, the way you pull me and move  
me

A far don't seem so far, yeah now, it's gravity  
Two hearts hung amongst the heaven  
You and I were destined, to collide  
I'm open wide and these eyes, fixed upon a vision  
You are all I'm missing  
Someone I could love without loud yeah  
And love em is the empty space of my heart  
I could live with no doubt  
I feel invincible when we create this all, baby

I'm just a shooting star, the way you pull me and move  
me

A far don't seem so far, yeah now, it's gravity  
Caution collision oh, caught up compellin for  
Long as it's you I want to  
Take a deep breath it's time to let go and close my  
eyes  
What am I waiting for, here I go

I'm just a shooting star, the way you pull me and move  
me

A far don't seem so far, yeah now, it's gravity  
I'm just a shooting star, the way you pull me and move  
me  
A far don't seem so far, yeah now, it's gravity
