One two three

I used to think love
Was the medicine for everything
Now I think I know better
I'm gonna walk alone
Brave and tried
Just a little bit to shy

I can't take it
I can't take it anymore
I won't fake it
I won't fake it anymore

Everyday is just another
Get up and go around
Spinning and tumbling
I got both feet on the ground
Open a window
There's so many things to believe

I can't take it
I can't take it anymore
I won't fake it
I won't fake it anymore

Somehow and someday
We'll find the will to live
One road and one heart
And one more war inside
The further and further
And further we go

I can't take it
I can't take it anymore
I won't fake it
I won't fake it anymore
