Never thought the world could lose it's sunshine
The sky is blue and so's their melody
'Til I tried to tell you how I love you
'Til you said you couldn't care for me

If I could only make you care
If I could only make you see
How much I love... how much I need you
And how I prayed you'd care someday

If I could press you to my heart
And make you feel... a longing there
The burning wish... to have you love me
If I could only make you care

Instrumental break Â– 8 bars

If I could press you to my heart
And make you feel a longing there
The burning wish... to have you love me
If I could only make you care

The burning wish... to have you love me
If I could only make you care
