### "Listen To Her"

All alone in a broken world  
Finding a new place to start  
The light has replaced the dark  
But she hasn't gone far

So she looks to me for the comfort she needs  
But she's all alone  
And she looks to you but the comfort is blue  
She's barely hanging on

Well good  
That's so cold  
And lies incased with iniquity  
Take it take it all  
You did it for your glory

Searching now for a better place  
Than this world has offered her  
Determined that there is more to life  
Than to just live and die
