The Real music in you
The music in you
I wish you won a million
Stars in the sky

Just hoping one of a shooting light
I want the world to know
Who I'm inside

Don't wanna hide upon a \$pread
My wings and fly
When while i'm free of fireflies
A friond will see right

Thru the heart of me
Friends always brighten the days
Friends always know what to say
You know you find a friend
That's real, that's true

When they hear the real music in you
The music in you

There's nothing better
Than just being who you are
All I need are my friends and guitar
We' ll play and sing

Our songs and perfect harmony
Friends always brighten the days
Friends always know what to say

You know you find a friend
That's real, that's true
When they hear the real music in you
The music in you

And the real music in you
The music in you
Friends always brighten the days
Friends always know what to say

You know you find a friend
That's real, that's true
When they hear the real music in you
The music in you

And the real music in you
The music in you yeah
The Real music in you
