They're your dark secrets
Say it like you mean it
The words have impact
Take them where you wanna go
It's your hand to share
So even if you don't care
When it's out, let go
Live it like a novel would
Don't think twice i'm alright
So... so normal
They're your dark secrets
Say it like you mean it
The words have impact
Even when you're all alone
Now you'll accept the worst dares
You even cut your own hair
So carry in the author
Living off her own device
The boys they wanna treat you
The girls they wanna meet you
The ones that like to push back
I really really wanna know
Don't think twice i'm alright
So... so normal
They're your dark secrets
Say it like you mean it
The words have impact
Live it like a novel should
And you're never shy
It takes a lot to cry
And make your ears go down
And when you make that walk
You get the whistles up
And turn us all away
And when you wrote this song
You had the greatest words
You threw them all away!
