Another lover
Another baby
Another reason
To be with someone else

Another promise
Another alibi
Another lifetime
That's filled with wondering why

Ouch damn
This is gonna hurt again
Oops now, should've known
That this is how it goes down
When you're around

Ouch damn
This is gonna hurt again
Oops now, should've known
That this is how it goes down
When you're around

Another party
Another evening
Another reason to be with someone else

Another promise
Another alibi
Another lifetime
That's filled with wondering why

Ouch damn
This is gonna hurt again
Oops now, should've known
That this is how it goes down
When you're around

Ouch damn
This is gonna hurt again
Oops now, should've known
That this is how it goes down
When you're around
