This movie would've killed us
It would've made a mess
I'd have lit the fires but i'd have pulled you out
Take a shot from every angle
I'd have shot you down
I'd have made you look fucking beautiful

Don't think cos you can't see me that i'm not watching
He got leather
He got car
Well me got channels on cctv

This movie would've killed us
We'd have cut a deal
I'd have set the traps but i'd have pulled you out

Lend a hand make all the right moves
I'd have helped you out
I'd have made it perfect just for you

This movie would've killed us
To shit and it's because of you
But hey, you didn't want to make it
Instead you made it with him
Guess i just didn't make the final cut

Yeah this movie's gonna kill me
But it'll kill you first
We could've made it you but oh, it's just too late now
I'd have made us a killer movie
