Haven't you heard  
It's getting that time  
So go spread the word  
And get practicing your rhymes

The foot and the bear  
And signature moves  
A word in your ear  
And look who's doing stuff

We love the way you move  
We love the way you move  
We love the way you move  
We love the way you move

I know we've been gone  
And we're never around  
But we're coming home  
And we've missed getting down

You'll always remain  
The beautiful boys  
So don't ever change  
And just go get the girls

We love the way you move  
We love the way you move  
We love the way you move  
We love the way you move

And it's all a request just to carry it on  
A force of a habit, to drag us along  
We gave you excuses, we gave you a song  
You carried it on

We love the way you move  
We love the way you move  
We love the way you move  
We love the way you move
